BEKKER-PS(PTY)LTD

ABOUT US

Bekker Project Solutions is a Gauteng based consulting firm, providing a full range of EPCM support services to the private and commercial sectors. With the main focus being project control and finding cost effective solutions for completing projects successfully - on time and within budget.

With more than a 150 years of combined experience throughout various sectors and markets, and a passion for precision and cost saving, Bekker PS is the perfect partner for making your next project a success.

Our network of experienced Project Professionals in various disciplines and with extensive working experience with all major Mining, Process, Project and Engineering houses throughout Southern Africa, allows Bekker PS to provide a tailored and scalable solution to suit your projects needs.

OUR VISION

As market pressure increases the need to find cost effective solutions for the EPCM industry, the need for a trusted consulting partner that can assist during peak periods, becomes more apparent.

Bekker Project Solutions strives towards becoming such a consulting partner for the EPCM market - a trustworthy consulting partner, that can seamlessly integrate with your existing team to expand your company's offering and capabilities, when clients or projects demand more - building lasting and value adding relationships with our clients.

Whether it is as a part of the client or contractor team, our passion for precision, cost saving, efficiency and ethical business practices can add value to your business.

PROJECT CONTROLS

- » RISK MANAGEMENT
- » CORRECTIVE ACTION
- » CLOSE-OUT & ANALYSIS

Whether it is to bolster the Client team, increase the Principal contractor capabilities or to formalise a sub-contractors offering - we offer scalable and cost effective consulting solutions to suit your budgets needs.

Enjoy improve productivity and profit margins by making Bekker Project Solutions a part of your team.

DID YOU KNOW?

In Southern Africa, an estimated 70 % of projects run over budget, with 36 % of these projects running over budget by between 10% and 50%

91% of projects experience delays of 1 or more months, with 47% of these projects experience more than 6 months of delays.

68% of respondents noted that the #1 reason for these delays are internal factors, while only 15% felt that unplanned / external factors were to blame.

Indications that Project Management and Control remain a major pitfall in the Southern African market.

At Bekker Project Solutions, we understand that there is no such thing as a “one size fits all” solution when it comes to project control. Every project is different and requires different levels of control throughout it’s life cycle to remain cost effective. The basics, however, remain... and doing them right is crucial to maintaining control throughout.

Bekker PS can assist clients with laying the project control foundation by implementing proven structures and systems OR improve on existing systems and processes, by reviewing, optimizing and adding our expertise to take your projects control to the next level.

Some of the main focus areas that we can assist with:

- Strategy development and alignment throughout all aspects and phases of the project.
- Organizational strategy implementation, assurance and guidance.
- Planning throughout all aspects and phases of the project - Tender, Project Set-up, Construction, Extension of time claims & Re-baselining, Acceleration and Close-out.
- Custom and value adding reporting, with tailored dashboards to suit individual stakeholder needs.
- Enterprise dashboards for simplified but effective management reporting on multiple projects.
- Progress measuring and validation for accurate reporting (Remote or On-site)
- Systemic Audits, Monitoring and Optimization.
- Risk management support, Schedule risk reviews, Mitigating action plans and Program adjustment.
- Impact mitigation plans and Corrective action implementation.
- Project Close-out and Analysis - Final Account, lessons learnt, development and improvement.

PROJECT PROBLEMS... SOLVED!

PROJECT AND CONSTRUCTION MANAGEMENT

- » SCOPE
- » RESOURCING
- » COSTING
- » PROCUREMENT
- » CONSTRUCTION & EFFICIENCY
- » QUALITY
- » STAKEHOLDERS
- » EXECUTION & OPTIMIZATION

Whether it is to bolster the Client team, increase the Principal contractor capabilities or to formalise a sub-contractors offering - we offer scalable and cost effective consulting solutions to suit your budgets needs.

Enjoy improve productivity and profit margins by making Bekker Project Solutions a part of your team.

Missed opportunities and the inability to react timeously as a result of work load, cause losses on most projects. Getting it done eventually, is not always good enough... and it is during these times that a trustworthy consulting partner can be a valuable addition to your team. Don't let an opportunity slip by just because your resources are all to busy...

Project and Construction Management is a crucial part of delivering projects successfully and over the past decade, the South African market has come a long way in formalizing the various structures supporting professional management.

The ability to scale, accelerate and react, however, seems to still be a shortfall in the market... and it is for this reason that Bekker Project Solutions has identified the need to provide consulting support services to the Project and Construction Management sector.

This allows our clients to run a smaller, core team of personnel for the majority of the project, while only scaling up during peak stages or when there is a need to react on an urgent opportunity.

Some of the main focus areas that we can assist with:

- Scope Definition and Breakdown for Tender, Project Setup and Variation Orders.
- Resourcing and Resource Strategy.
- Costing Review, Budget Validation and Refinement.
- Procurement Support and Expediting.
- Construction Management Support, Efficiency Measurement and Improvement.
- Quality Management Systems.
- Stakeholder Management Support.
- Execution and Operational Support.
- Systemic Audits and Optimization.
- Departmental Communication and Mediation.

PROJECT PROBLEMS... SOLVED!

COMMERCIAL MANAGEMENT

- » CONTRACT
- » SYSTEMS
- » CLAIMS

Commercial Management is key to delivering successful and profitable projects in today's market... having a full-time commercial team on the other hand, is expensive and in many cases not practical for a specific project's budget.

Bekker PS offers cost-effective consulting solutions to ensure that your project receives the required Commercial support, whether it is supplementary to your existing team or a standalone, there is no need to risk commercial repercussions because of budget constraints.

Some of the main focus areas that we can assist with:

- Contract Breakdown, Flow Charts and Simplification.
- Systemic Audits, System Implementation and Commercial Checks & Balances.
- Commercial Claim Support.

GENERAL CONSULTING

Bekker Project Solutions provides a General Consulting service, offering clients the service of an impartial 3rd party with experience and speciality skills throughout all facets of project delivery.

With the freedom to move freely throughout various departments, give guidance, facilitate processes and report directly to different levels of management - General Consulting is aimed at:

- Driving management's vision throughout all departments and project facets.
- Improving departmental communication and integration through mediation and consultation.
- Improving efficiency through systemic reviews and optimization action plans.
- Improving staff development and decision making through mentoring and coaching.
- Improving construction and production performance through LEAN planning facilitation, training and implementation.
- Mitigating short-term skill shortages.
- Identifying and driving core and critical processes.
- Driving 100% completion.
